

Along with the quick development of information network technology, Inverter /Sine wave Inverter special design for the electric power system is a new DC to AC conversion power supply. Use the battery DC as input after inverting , it will output the pure sine wave AC.

The inverter of this series employs advanced SPWM and CPU control technology to realize precise control, isolated input and output, output soft start, safety and high efficiency, good reliability and strong impact resistance to inductive load.

Inverter can eliminate the disadvantage such as power interrupt , unconstance voltage, noise interface and surge etc.

## Model PE-I

### Rack Mount Power Inverter

Line, Inv,Bat,Load  
Adjustable Button
